

Around a fire

Stories just keep coming

Together around the fire, familiar, comfortable. A good glass of wine, some nice music, the warmth around you, the light of the dancing flames. The stories come automatically. About what happened to you during the day, developments at work, news from friends and family. The stories from your past and your big dreams for the future. Things you don't usually share with others but that come so easy now, enveloped by warmth and trust. That's what a fire does to a person! Traditionally, fires were lit to keep the outside world at a distance. It's why a fire creates an atmosphere of intimacy and contact, where you listen to each other's stories.

A fire connects

Around a fire you share your holiday experiences with your friends, you tell your children a bedtime story, and you share your most intimate feelings with your loved one.

A look is all you need, and together you enjoy peaceful silence, gazing at the flames, because you don't need words to understand each other. The fire of love, where better than in front of an open fire? That is where you experience your most beautiful moments and when you take time for each other. That is where you share your stories, full of passion and full of fire!

There is **so much to tell...**

Faber means **175 years of quality**

The connective and soothing effect of an open fire is our passion. We are always looking for the best and most beautiful solutions, because we want our connoisseurs to enjoy an astonishing flame effect.

We strive for the same warmth and urge for quality in our contact with those around us. Our fires have been developed and produced in the Netherlands for devotees all over the world for more than 175 years. Today, Faber is part of the Irish family business Glen Dimplex, market leader in top-quality ambient electric fires. A strong and trusted combination, with a pure origin!

In the vanguard of the fire of the future

Faber's 'fire makers' are driven to produce the most beautiful ambient fires. Rooted in log fires, leading in gas fires and in the vanguard of fires with new fuels, such as biopropane, propane and water mist. With pure craftsmanship, knowledge and advanced technology, Faber is responsible for discoveries and patents that have become standard in the world of fires today. Our latest series of fires, the 'e-Matrix', uses water and electricity and is equally innovative. In short, 'making' ambient fires is part of Faber's DNA, and our pride and passion!

Your Faber fire built especially for you

If you choose a Faber, we build, adjust the settings and check the fire specifically for you. You can be certain that you have a characteristic Faber fire effect and a fire that operates perfectly and safely.

Outdoor

Long summer evenings around a fire

You want to make as much use as you can of your beautiful garden or wonderful patio. Coffee with friends on a cool spring day, a garden party on a long summer evening, or a wonderful book on a lazy late-summer afternoon. An outdoor fire creates more atmosphere, produces comfortable radiating warmth so you can stay out much longer.

Faber outdoor fires enrich any patio or garden. First of all with the characteristic, lively Faber flames that you can see from all sides through the large glass surface. Flames that are designed with Faber's craftsmanship and quality, appreciated so much by those who love our inset fires. The designs speak of considered simplicity and class, never dominate, but are there to be admired at any time.

Faber outdoor fires work on gas and have automatic ignition, so operation requires little attention and the fires work without any hint of a smell. With the optional gas socket, you can also connect the fire to a permanent gas connection, making the fire even easier to use.

That is how you get more from your garden or patio with a Faber outdoor fire!

The options per fire produce an additional cost.

For more information, please take a look at the website www.faber-fires.eu

You would like your Faber outdoor fire on natural gas, propane or biopropane? No problem!

All Faber outdoor fires burn on natural gas and on propane. Your fire can be fitted with an outdoor gas connection, so you can connect it to a permanent gas pipe. It means a gas bottle is no longer necessary, and that is even more convenient!

Faber outdoor fires are also suitable for environmentally friendly propane or biopropane. If you would like to find out more about the options of propane or biopropane, please take a look at our website.
