

e-BoX

The electric Faber e-BoX series has been developed especially for true fire connoisseurs who are looking for a complete and 100% future-proof alternative to an atmospheric gas or wood fire, and who value a good price-quality ratio. The new Faber e-BoX series provides a unique solution for the full enjoyment of a swirling, atmospheric fire, without the traditional limitations that may be associated with a built-in gas or wood fire. For example, limitations because of the living environment (city), apartment blocks, the lack of a connection to the gas grid or a chimney, or because there is no room to build in a fire.
